DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to compounds

Group II claim(s) 6, 9-12 and 14-16 drawn to a method of producing compounds.

Group III claim(s) 7, 13, 17-19 drawn to a method of producing a functional PNA oligomer.

Unity exists when there is a technical relationship among the claimed inventions involving one or more corresponding special technical features. A special technical feature is a contribution which each of the inventions, considered as a whole, makes over the prior art. See M.P.E.P Appendix A1, § 206 and Annex B.

Here, the foregoing groups lack unity since the special technical features of the groups do not correspond, i.e., structure of the cited compounds vis-à-vis the steps required in the methods of preparing the compounds or functional PNA oligomers.
